Solution's to Aztec Rogue foods

You guys said you guys wanted more sustainable stuff and more products when we were talking to you guys you said that your beef jerky was the most valuable products and we were searching for prices and we saw that all of them had more stuff like pinion nuts and smoked meats. We also were looking at the prices of 6 oz of beef jerky and yours were a little more pricey than others so we think you should lower it about \$1 or two. Like we were saying you have very little amount of products we were looking at juicy jerky and we saw that they had a lot of products like what we said.
