Manufacturing is defined as changing the form, fit or function of a task, product, object or material.

Are you a manufacture?

WHAT IS INTELLIGENT MANUFACTURING?

“Intelligent Manufacturing” (IM) means using the combined intelligence of people, processes and machines, to impact the overall economics of manufacturing.

At its core, Intelligent Manufacturing is pretty simple: It’s a way of applying visionary solutions to make your production strategies exceptional.

New Mexico Manufacturing Extension Partners is dedicated to increasing the competitiveness of our state’s small and mid-sized businesses
